Table with Question Number (1-10) and Leave Blank columns.

Materials required for examination: Mathematical Formulae (Pink)
Items included with question papers: Nil

Candidates may use any calculator allowed by the regulations of the Joint Council for Qualifications.

Instructions to Candidates

In the boxes above, write your centre number, candidate number, your surname, initials and signature. Check that you have the correct question paper. Answer ALL the questions. You must write your answer to each question in the space following the question. When a calculator is used, the answer should be given to an appropriate degree of accuracy.

Information for Candidates

A booklet 'Mathematical Formulae and Statistical Tables' is provided. Full marks may be obtained for answers to ALL questions. The marks for individual questions and the parts of questions are shown in round brackets: e.g. (2). There are 10 questions in this question paper. The total mark for this paper is 75. There are 32 pages in this question paper. Any blank pages are indicated.

Advice to Candidates

You must ensure that your answers to parts of questions are clearly labelled. You should show sufficient working to make your methods clear to the Examiner. Answers without working may not gain full credit.

Leave
blank

1.

$$f(x) = 2x^3 - 6x^2 - 7x - 4$$

(a) Show that $f(4) = 0$

(1)

(b) Use algebra to solve $f(x) = 0$ completely.

(4)

Leave blank

Question 2 continued

Blank lined area for question answer.

(Total 6 marks)

Q2

Leave blank

Question 3 continued

Lined area for writing the answer to Question 3.

(Total 6 marks)

Q3

5.

Figure 1

Figure 1 shows a sketch of the parabola C with equation $y^2 = 8x$.
 The point P lies on C , where $y > 0$, and the point Q lies on C , where $y < 0$.
 The line segment PQ is parallel to the y -axis.

Given that the distance PQ is 12,

(a) write down the y -coordinate of P , (1)

(b) find the x -coordinate of P . (2)

Figure 1 shows the point S which is the focus of C .
 The line l passes through the point P and the point S .

(c) Find an equation for l in the form $ax + by + c = 0$, where a , b and c are integers. (4)

6.

$$f(x) = \tan\left(\frac{x}{2}\right) + 3x - 6, \quad -\pi < x < \pi$$

(a) Show that the equation $f(x) = 0$ has a root α in the interval $[1, 2]$.

(2)

(b) Use linear interpolation once on the interval $[1, 2]$ to find an approximation to α . Give your answer to 2 decimal places.

(3)

Leave blank

Question 6 continued

A large area with horizontal lines for writing the answer to Question 6.

(Total 5 marks)

Q6

7.
$$z = 2 - i\sqrt{3}$$

(a) Calculate $\arg z$, giving your answer in radians to 2 decimal places.

(2)

Use algebra to express

(b) $z + z^2$ in the form $a + bi\sqrt{3}$, where a and b are integers,

(3)

(c) $\frac{z + 7}{z - 1}$ in the form $c + di\sqrt{3}$, where c and d are integers.

(4)

Given that

$$w = \lambda - 3i$$

where λ is a real constant, and $\arg(4 - 5i + 3w) = -\frac{\pi}{2}$,

(d) find the value of λ .

(2)

Leave
blank

Question 7 continued

A large area for writing, consisting of approximately 30 horizontal lines.

Leave
blank

Question 7 continued

Lined area for writing the answer to Question 7.

(Total 11 marks)

Q7

--	--

P 4 0 6 8 8 A 0 1 9 3 2

Leave
blank

8. The rectangular hyperbola H has equation $xy = c^2$, where c is a positive constant.

The point $P\left(ct, \frac{c}{t}\right)$, $t \neq 0$, is a general point on H .

(a) Show that an equation for the tangent to H at P is

$$x + t^2y = 2ct \tag{4}$$

The tangent to H at the point P meets the x -axis at the point A and the y -axis at the point B .

Given that the area of the triangle OAB , where O is the origin, is 36,

(b) find the exact value of c , expressing your answer in the form $k\sqrt{2}$, where k is an integer. (4)

9.
$$\mathbf{M} = \begin{pmatrix} 3 & 4 \\ 2 & -5 \end{pmatrix}$$

(a) Find $\det \mathbf{M}$. (1)

The transformation represented by \mathbf{M} maps the point $S(2a - 7, a - 1)$, where a is a constant, onto the point $S'(25, -14)$.

(b) Find the value of a . (3)

The point R has coordinates $(6, 0)$.

Given that O is the origin,

(c) find the area of triangle ORS . (2)

Triangle ORS is mapped onto triangle $OR'S'$ by the transformation represented by \mathbf{M} .

(d) Find the area of triangle $OR'S'$. (2)

Given that

$$\mathbf{A} = \begin{pmatrix} 0 & -1 \\ 1 & 0 \end{pmatrix}$$

(e) describe fully the single geometrical transformation represented by \mathbf{A} . (2)

The transformation represented by \mathbf{A} followed by the transformation represented by \mathbf{B} is equivalent to the transformation represented by \mathbf{M} .

(f) Find \mathbf{B} . (4)

Leave
blank

Question 9 continued

Lined writing area for the answer to Question 9, consisting of approximately 22 horizontal lines.

Leave blank

Question 10 continued

Lined writing area for question 10

(Total 6 marks)

Q10

Mark box for Q10
