Pearson Edexcel IAL Accounting (WAC12) Paper 01 Corporate and Management Accounting

### Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at <u>www.edexcel.com</u> or <u>www.btec.co.uk</u>. Alternatively, you can get in touch with us using the details on our contact us page at <u>www.edexcel.com/contactus</u>.

### Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

#### **General Marking Guidance**

• All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.

• Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.

• Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.

• There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.

• All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.

• Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.

• When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.

• Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Question Number	Answer	Mark		
1 (a)(i)	1 (a) (i) AO1 (4) AO1: Four marks for correct identification and calculation of costs to arrive at standard cost.			
	Standard cost of one pair of trousers =			
	(0.75 hours x £7.20) + (2.5 sq m x £3.46) + (£17 000 / 20 000)			
	= $\pm 5.40(1) \text{ AO1} + \pm 8.65(1) \text{ AO1} + \pm 0.85(1)$ AO1 = $\pm 14.90(1) \text{ o/f AO1}$	(4)		

Question Number	Answer	Mark
1 (a)(ii)	<ul> <li>AO1 (6), AO2 (3), AO3 (1)</li> <li>AO1: Six marks for calculations to find cost totals and overall cost.</li> <li>AO2: Three marks for application of knowledge in calculations.</li> <li>AO3: One mark analysis of pay rise.</li> </ul>	
	Actual cost of 20 000 pairs of trousers =	
	Labour ( $\pm 7.20 \times 0.75$ ) (1) AO2 x 20 000 = 108 000 (1) AO1 Plus	
	$(850 \times £7.20) = 6 120 (1) AO1$ Plus (0.25  hour  x £7.20(1) AO2	
	x 10 000 x 0.05 (1)) AO3 = $\frac{900}{115020}$ (1) AO1 115 020	
	Material(£8.65 x 15 000)= 129 750 (1) A01Plus(£8.9 x 5 000)= $\frac{44 500}{174 250}$ (1) AO2	
	Fixed overheads = <u>15 730 (1) AO1</u> 305 000 (1) o/f AO1	(10)

Question Number	Answer	Mark
1 (a)(iii)	AO1 (3) AO1: Three marks for correct identification of figures and calculation to arrive at actual cost.	
	Actual cost of one pair of trousers = $£305\ 000\ (1)\ 0/f\ AO1\ =\ £15.25\ (1)\ 0/f\ AO1\ 20\ 000\ (1)\ AO1$	(3)

Question Number	Answer	Mark
1 (b)(i)	AO2 (3), AO3 (2) AO2: Three marks for correct application of data and calculation of labour rate variance. AO3: Two marks for correct analysis of data and use in calculation of labour rate variance.	
	Labour rate variance = $(£7.20 (1) AO2 - \frac{115 020}{15 850} (1) o/f AO3 \times 15 850 (1) AO2$ = $(£7.20 - £7.2568) \times 15 850 = £900 Adv (1) o/f AO2$	(5)

Question Number	Answer	Mark
1 (b)(ii)	1 (b) (ii) AO2 (4) AO2: Four marks for application of data to calculate labour efficiency variance.	
	Labour efficiency variance = (15 000 (1) AO2 - 15 850(1)) AO2 x £7.20 (1) AO2 = £6 120 Adverse (1) AO2	(4)

Question Number	Answer	Mark
1 (b)(iii)	AO2 (3) AO2: Three marks for application of data to calculate labour rate variance.	
	Total labour rate variance = (£900 Adv (1) o/f AO2 + £6 120 Adv(1) o/f) AO2 = £7 020 Adverse (1) o/f AO2	(3)

Question Number	Answer	Mark
1 (b)(iv)	AO2 (2), AO3 (3) AO2: Two marks for correct application of data and calculation of material price variance. AO3: Three marks for correct analysis of data and use in calculation of material price variance.	
	Material price variance = (£3.46 (1) AO2 - $\frac{£174 250}{50 000}$ (1) o/f AO3 X 50 000 (1) AO3 = £1 250 Adverse (1) o/f AO2	(5)

Question Number	Answer			Mark
1 (c)	AO2 (6) AO2: Six marks for concentration of costs and complete reconciliation of costs and complete reconciliation statements and the statements and the statements and the statements and the statements are statements are statements and the statements are statement	nd variances n	to	
		£		
	Budgeted Cost of Output	298 000 (1) o/f AO2		
	Labour variance	7 020 Adv (1) o/f AO2		
	Material variance	1 250 Adv (1) o/f AO2		
	Overhead Variance	1 270 Fav (1) AO2		
	Variances Total	7 000 Adv (1) o/f AO2		
	Actual Cost of Output	305 000 (1) o/f AO2		
				(6)

Question Number	Answer	Mark
1(d)	AO1 (3) AO1: Three marks for correct identification and of reasons. Reasons for fixed overheads being below budget: - reduction in rent payable (1) AO1	
	<ul> <li>reduction in managers salaries (1) AO1</li> <li>reduction in depreciation (1) AO1</li> <li>reduction in heating costs (1) AO1</li> <li>incorrect budget setting (1) AO1</li> <li>any other suitable reason</li> </ul>	(3)

Question	Indicative content	Mark
Number		
1 (e)	<ul> <li>A01 (1), A02 (1), A03 (4), A04 (6)</li> <li>For Keeping 50% mark up <ul> <li>Need to maintain profit margin, cannot keep same selling price for ever.</li> <li>Customers may be quite willing to pay the higher price. The market may be able to carry this level of mark-up.</li> <li>New price may still be below that of rival firms.</li> <li>The increase in costs is £0.35, so this would mean an increase of £0.52 pence in the sales price. The selling price would rise from £22.35 to £22.87. Would customers notice this increase?</li> <li>Profit would rise to £7.62 per item from £7.45 per item.</li> </ul> </li> </ul>	
	<ul> <li>Against         <ul> <li>Passing on the increase in production cost.</li> <li>Could absorb rising costs by increasing efficiency. Some areas are becoming more efficient - there seems to have been some reduction in costs in overheads.</li> <li>Customers could be unhappy and go to a rival supplier. The market may be very competitive.</li> <li>New price could price make firm's price higher than rivals.</li> <li>The increase in costs is £0.35, so this would mean an increase of £0.52 pence in the sales price to £22.87. Would customers find this too much?</li> <li>Some of the increased costs were because of the problems with the electricity supply – is it fair that customers should carry the burden of this problem?</li> <li>The cutting department has been awarded a 5% wage rise but not the sewing department. This might cause dissent and a claim for a higher wage by sewing staff, thus leading to a rise in labour wages.</li> </ul> </li> <li>Decision         <ul> <li>Candidates may argue for or against continuation of a mark-up of 50%. The decision should be supported by reference to key points of their argument.</li> </ul> </li> </ul>	(12)

Level	Mark	Descriptor	
	0	A completely incorrect response.	
Level 1	1-3	Isolated elements of knowledge and understanding recall based. Weak or no relevant application to the scenario set. Generic assertions may be present.	
Level 2	4 - 6	<ul><li>Elements of knowledge and understanding, which are applied to the scenario.</li><li>Chains of reasoning are present, but may be incomplete or invalid.</li><li>A generic or superficial assessment is present.</li></ul>	
Level 3	7 - 9	Accurate and thorough understanding, supported throughout by relevant application to the scenario. Some analytical perspectives are present, with developed chains of reasoning, showing causes and/or effects. An attempt at an assessment is presented, using financial and maybe non-financial information, in an appropriate format and communicates reasoned explanations	
Level 4	10 -12	Accurate and thorough knowledge and understanding, supported throughout by relevant and effective application to the scenario. A coherent and logical chain of reasoning, showing causes and effects. Assessment is balanced, wide ranging and well contextualised using financial and maybe non-financial information and makes informed recommendations and decision(s).	

Question Number	Answer		Mark
2 (a)	A01 (6) AO1: Six marks for c calculation to arrive Calculation of Purchas		c
	Buildings Computers	Homesales plc (£000) 20 000 4 000 (1) AO1 (any 2 NCA)	
	Fixtures and Fittings Vehicles	1 400 700 (1) AO1 (next two NCA)	
	Inventory Trade receivables	340 2 110 (1) AO1 (any 2 CA)

Question Number	Indicative content	Mark
2 (f)	AO1(1), AO2 (1), AO3 (4), AO4 (6) Possible answers could include:	
	Goodwill is the difference between the value of a business as a whole, and the fair value of its net assets. The value of the business could be said to be the price that a buyer agrees to pay for the business. The fair value of the business is agreed after the possible revaluation of assets and liabilities. The correct treatment of the goodwill paid, or purchased, would be to amortize the goodwill over its useful economic life.	
	<u>For this treatment</u> The buyer is likely to derive benefits from the expenditure over a number of years, so spreading the cost of this expenditure over a number of years agrees with the matching concept and gives a true and fair view of the accounts. This treatment is in line with recommended practice. i.e. FRS102 / IAS 38	
	To write the goodwill off immediately may make profit unrealistically low, and the tax charge on profits would be unfairly low.	
	Case against this treatment If goodwill were to be written off immediately against reserves, the prudence concept is followed. It is difficult to estimate the number of years the buyer will benefit from the purchase of the business assets. Thus, the annual amortisation charge in the accounts may be unrealistic.	
	Decision Writing off over a number of years is recommended and beneficial as it gives a true and fair view of the accounts. The decision should be supported by reference to key points of their argument.	
		(12)

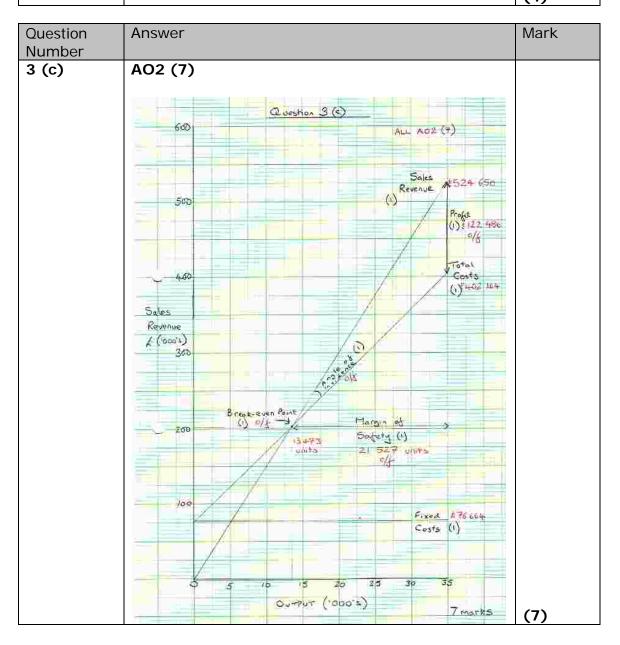

Level	Mark	Descriptor
	0	A completely incorrect response.
Level 1	1- 3	Isolated elements of knowledge and understanding which are recall based. Weak or no relevant application to the scenario set. Generic assertions may be present.
Level 2	4 - 6	Elements of knowledge and understanding, which may be applied to the scenario. Chains of reasoning are present, but may be incomplete or invalid. A generic or superficial assessment is present.
Level 3	7 - 9	Accurate and thorough understanding, supported by relevant application to the scenario. Some analytical perspectives are present, with developed chains of reasoning, showing causes and/or effects. An attempt at an assessment is presented, using financial and maybe non-financial information, in an appropriate format and communicates reasoned explanations.
Level 4	10 - 12	Accurate and thorough knowledge and understanding, supported throughout by relevant application to the scenario. A coherent and logical chain of reasoning, showing causes and effects. Assessment is balanced, wide ranging and well contextualised using financial and maybe non- financial information and makes an informed decision(s).

		A completely incorrect response.	
Level 1	1-2 Isolated elements of knowledge and understanding that are recall based. Generic assertions may be present. Weak or no relevant application to the scenario set.		Ū.

Level 2	3-4	Elements of knowledge and understanding, which are applied to the scenario. Some analysis is present, with developed chains of reasoning, showing causes and/or effects applied to the scenario, although these may be incomplete or invalid. An attempt at an evaluation is presented, using financial and perhaps non-financial information with a decision.
Level 3	5-6	Accurate and thorough knowledge and understanding. Application to the scenario is relevant and effective. A coherent and logical chain of reasoning, showing causes and effects is present. Evaluation is balanced and wide-ranging, using financial and perhaps non-financial information and an appropriate decision is made.

Question Number	Answer	Mark
6 (a)(i)	AO1 (2) AO1: Two marks, one for an advantage one for a disadvantage.	
	<u>Advantage</u> Lower costs of storing / holding inventories e.g. rent, insurance, security (1) AO1	
	Disadvantage Less / decrease in range in inventories which means customers may be disappointed and buy from other suppliers (1) AO1	(2)

Question Number	Answer	Mark
6 (a)(ii)	AO1 (1), AO2 (1) AO1: One mark for correct calculation of amount owed by customers at year end. AO2: One mark for correct application of figures to arrive at amount owed by customers at year end.	
	(£45 000 + £38 000) (1) AO2 = £83 000 (1) AO1	(2)

Question Number	Answer	Mark
6 (a)(iii)	AO1 (1), AO2 (1) AO1: One mark for correct calculation of amount owed to suppliers at year end. AO2: One mark for correct application of figures to arrive at amount owed to suppliers at year end.	
	(£33 000 + £26 000) (1) AO2 = £59 000 (1) AO1	(2)

Question Number	Answer	Mark
6 (a)(iv)	<ul> <li>AO2 (1), AO3 (2)</li> <li>AO1: One mark for correct identification of amount paid in the year.</li> <li>AO2: Two marks for correct calculation of interest and accrued amount.</li> </ul>	
	£400 000 x 6% = £24 000 (1) AO3 Paid in year £22 000 (1) AO2 so £2 000 accrued (1) AO3	(3)

Question Number	Answer	Mark
6 (a)(v)	AO3 (2) AO3: Two marks for correct calculation of profit after interest payments.	
	£1 260 000 – (£24 000 + £2 000)(1) AO3 = £1 234 000 (1) AO3	(2)

Question Number	Answer	Mark
6 (a)(vi)	AO1 (1), AO2 (1), AO3 (1) AO1: One mark for correct identification of amount received from sale. AO2: One mark for correct identification of LOSS from sale. AO3: One mark for calculation of book value of plant when sold. £51 000 (1) AO2 + £11 000 (1) AO3	
	= £62 000 (1) AO1	(3)

Question Number	Answer	Mark
6 (a)(vii)	<ul> <li>AO2 (2)</li> <li>AO2: Two marks, one for each reason.</li> <li>Answers may include – maximum of 2 marks AO2 (2)</li> <li>Kontire Digital plc have surplus liquid funds (which they wish to utilise to earn a return).</li> <li>Shares will pay future dividends</li> <li>Share price may rise in the future</li> </ul>	(2)

Question Number	Answer	Mark
6 (a) (viii) AO3 (2) AO3: Two marks for correct calculation of value of preference shares.		
	$4\% \text{ of } X = \pounds 8\ 000$ so $X = \frac{8\ 000}{4} \times 100\ (1)\ \text{AO3} = \pounds 200\ 000\ (1)\ \text{AO3}$	(2)

Question Number	Answer	Mark
6 (a)(ix)	(ix) AO2 (2) AO2: Two marks for correct calculation of cash balance at start of year.	
	(£119 000 + £27 000) (1) AO2 = £146 000 (1) AO2	(2)

Question Number	Answer	Mark
6 (a)(x)	AO3 (4) AO3: Four marks for correct calculation of movement on bank balance.	
	Year end bank balance = $(£1 203 000 - £609 000)$ (1) AO2 = $£594 000$ (1) AO2 Yearly movement = $(£594 000 + £27 000)$ (1) AO2	
	= £621 000 increase (1) AO2	(4)

Question Number	Answer		Mark
6 (b)	AO4 (6		
	Possible	e answers:	
	For the	e statement	
	or payir • L • N c • O	antages of outflow due to share redemption ng dividends iquid funds leave the company, which has a negative effect on cash flow and liquidity. Net worth (book value) of the company decreases. Company has less liquid funds to invest in possible profitable areas.	
	Agains	t the statement	
	0 F F S C C C	age of outflow due to share redemption Company does not require the funds. Redeeming shares would improve some atios eg return on capital employed. Shareholders are not happy or have a problem with the company, so buying them out will benefit company. Share price will rise if less shares in sirculation. Less dividends to pay in future.	
	• 5 0 • N • S	ages of paying dividends Shareholders kept happy and therefore quiet. May support share price. Sends out positive message and confidence n company may be maintained.	
	cash flo worryin	<u>n</u> relate to points made above i.e. negative w from financing activities is not always g. The decision should be supported by ce to key points of their argument.
