WFM01/01

You must have:
Mathematical Formulae and Statistical Tables (Blue)

Total Marks

--

Candidates may use any calculator allowed by the regulations of the Joint Council for Qualifications. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B). Coloured pencils and highlighter pens must not be used.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided – *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- When a calculator is used, the answer should be given to an appropriate degree of accuracy.

Information

- The total mark for this paper is 75.
- The marks for **each** question are shown in brackets – *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

10. In your answers to this question, the elements of each matrix should be expressed in exact form in surds where necessary.

The transformation U , represented by the 2×2 matrix \mathbf{P} , is a rotation through 45° anticlockwise about the origin.

(a) Write down the matrix \mathbf{P} . (1)

The transformation V , represented by the 2×2 matrix \mathbf{Q} , is a rotation through 60° anticlockwise about the origin.

(b) Write down the matrix \mathbf{Q} . (1)

The transformation U followed by the transformation V is the transformation T . The transformation T is represented by the matrix \mathbf{R} .

(c) Use your matrices from parts (a) and (b) to find the matrix \mathbf{R} . (3)

(d) Give a full geometric description of T as a single transformation. (2)

(e) Deduce from your answers to parts (c) and (d) that $\sin 75^\circ = \frac{1 + \sqrt{3}}{2\sqrt{2}}$ and find the exact value of $\cos 75^\circ$, explaining your answers fully. (2)

Horizontal lines for writing answers.
