Materials required for examination

Mathematical Formulae (Pink)

Items included with question papers

Nil

Candidates may use any calculator allowed by the regulations of the Joint Council for Qualifications. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions to Candidates

In the boxes above, write your centre number, candidate number, your surname, initials and signature. Check that you have the correct question paper.

Answer ALL the questions.

You must write your answer to each question in the space following the question.

When a calculator is used, the answer should be given to an appropriate degree of accuracy.

Information for Candidates

A booklet 'Mathematical Formulae and Statistical Tables' is provided.

Full marks may be obtained for answers to ALL questions.

The marks for individual questions and the parts of questions are shown in round brackets: e.g. (2).

There are 8 questions in this question paper. The total mark for this paper is 75.

There are 24 pages in this question paper. Any blank pages are indicated.

Advice to Candidates

You must ensure that your answers to parts of questions are clearly labelled.

You should show sufficient working to make your methods clear to the Examiner.

Answers without working may not gain full credit.

advancing learning, changing lives

1. (a) Express $\frac{3}{(3r-1)(3r+2)}$ in partial fractions.

(2)

(b) Using your answer to part (a) and the method of differences, show that

$$\sum_{r=1}^n \frac{3}{(3r-1)(3r+2)} = \frac{3n}{2(3n+2)} \quad (3)$$

(c) Evaluate $\sum_{r=100}^{1000} \frac{3}{(3r-1)(3r+2)}$, giving your answer to 3 significant figures.

(2)

Q1

1

(Total 7 marks)

Leave
blank

- $$\frac{d^2x}{dt^2} + x + \cos x = 0$$

Find a Taylor series solution for x in ascending powers of t , up to and including the term in t^3 .

(5)

Leave
blank

(Total 5 marks)

Q2

Leave
blank

- $$x + 4 > \frac{2}{x + 3}$$

(6)

- $$x+4 > \frac{2}{|x+3|}$$

(1)

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal gray lines across its entire width, providing a guide for handwriting or typing. The paper itself is a clean, off-white color. There are no margins, text, or other markings present on the page.

Q3

(Total 7 marks)

Leave
blank

4.

$$z = -8 + (8\sqrt{3})i$$

- (a) Find the modulus of z and the argument of z .

(3)

Using de Moivre's theorem,

- (b) find z^3 ,

(2)

- (c) find the values of w such that $w^4 = z$, giving your answers in the form $a + ib$, where $a, b \in \mathbb{R}$.

(5)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

Leave
blank

(Total 10 marks)

Q4

5.

Figure 1

Figure 1 shows the curves given by the polar equations

$$r=2, \quad 0 \leq \theta \leq \frac{\pi}{2},$$

and $r = 1.5 + \sin 3\theta$, $0 \leq \theta \leq \frac{\pi}{2}$.

- (a) Find the coordinates of the points where the curves intersect.

(3)

The region S , between the curves, for which $r > 2$ and for which $r < (1.5 + \sin 3\theta)$, is shown shaded in Figure 1.

- (b) Find, by integration, the area of the shaded region S , giving your answer in the form $a\pi + b\sqrt{3}$, where a and b are simplified fractions.

(7)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

(Total 10 marks)

Q5

Leave
blank

6. A complex number z is represented by the point P in the Argand diagram.

(a) Given that $|z - 6| = |z|$, sketch the locus of P . (2)

(b) Find the complex numbers z which satisfy both $|z - 6| = |z|$ and $|z - 3 - 4i| = 5$. (3)

The transformation T from the z -plane to the w -plane is given by $w = \frac{30}{z}$.

(c) Show that T maps $|z - 6| = |z|$ onto a circle in the w -plane and give the cartesian equation of this circle. (5)

(Total 10 marks)

Q6

7. (a) Show that the transformation $z = y^{\frac{1}{2}}$ transforms the differential equation

into the differential equation

(b) Solve the differential equation (II) to find z as a function of x . (6)

(c) Hence obtain the general solution of the differential equation (I). (1)

Q7

(Total 12 marks)

8. (a) Find the value of λ for which $y = \lambda x \sin 5x$ is a particular integral of the differential equation

$$\frac{d^2y}{dx^2} + 25y = 3 \cos 5x \quad (4)$$

(b) Using your answer to part (a), find the general solution of the differential equation

$$\frac{d^2y}{dx^2} + 25y = 3 \cos 5x \quad (3)$$

Given that at $x=0$, $y=0$ and $\frac{dy}{dx}=5$,

(c) find the particular solution of this differential equation, giving your solution in the form $y = f(x)$.

(d) Sketch the curve with equation $y = f(x)$ for $0 \leq x \leq \pi$. (2)

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
