

Mark Scheme (Results)

Summer 2013

International GCSE Accounting (4AC0)

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information, please visit our website at www.edexcel.com.

Our website subject pages hold useful resources, support material and live feeds from our subject advisors giving you access to a portal of information. If you have any subject specific questions about this specification that require the help of a subject specialist, you may find our Ask The Expert email service helpful.

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

14 (c)	Current ratio	(2)					
	<table><tr><td>Formula:</td><td>Calculation</td></tr><tr><td>Current assets/Current liabilities (1)</td><td>20 221/16 555 = 1.22:1 (1 of)</td></tr></table>		Formula:	Calculation	Current assets/Current liabilities (1)	20 221/16 555 = 1.22:1 (1 of)	
	Formula:		Calculation				
	Current assets/Current liabilities (1)		20 221/16 555 = 1.22:1 (1 of)				
Quick ratio (acid test)							
<table><tr><td>Formula</td><td>Calculation</td></tr><tr><td>Current assets - stock/Current liabilities (1)</td><td>(20 221 – 6000)/16 555 = 0.86:1 (1 of)</td></tr></table>	Formula	Calculation	Current assets - stock/Current liabilities (1)	(20 221 – 6000)/16 555 = 0.86:1 (1 of)	(2)		
Formula	Calculation						
Current assets - stock/Current liabilities (1)	(20 221 – 6000)/16 555 = 0.86:1 (1 of)						

Question Number	Answer	Mark
14 (d)	<p>Award (1) mark for a general statement regarding the change in liquidity over the two years; a further (2) marks for a discussion on the meaning of each individual ratio; (1) mark for the implication for their creditors and a final (1) mark for a conclusion.</p> <p>Sample answer</p> <p>The liquidity of the business has worsened over the two years (1) which is evidenced by the reduction in both ratios. The current ratio indicates that they are just able to cover their short term debts (1) whereas their quick ratio indicates that they are below the ideal ratio of 1:1. (1) The implication of this for a creditor is that the business may experience some difficulty in meeting its short term debts (1).</p> <p>The business needs to consider whether it needs to take steps to invest more cash into the business in order to meet its short term obligations (1)</p>	<p>(5)</p>

Question Number	Answer	Mark
15 (a)	<p>Straight line</p> <p>This method applies the same amount of depreciation or the same percentage rate each year (1). This method is used where each year is expected to benefit equally from the use of an asset (1).</p> <p>Reducing balance</p> <p>This method applies the same percentage rate of depreciation each year but it is calculated on a different value each year (1). This method is used where the greater benefits from the use of the asset will be gained in the early years of its life (1).</p>	<p>(2)</p> <p>(2)</p>
