General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Question Number	Answer	Mark
14 (e)	Award (1) mark for confirming that this will increase her profits. Award (1) mark for stating how stock should be valued and (1) mark for identifying that this suggestion would be in contravention of the prudence concept. A further (1) mark for stating the effect on both profit and assets and (1) mark for an appropriate conclusion. Sample Answer Rekha is correct in her statement that valuing the closing stock at selling price will increase her profits as the cost of sales will be reduced (1). However, stock should be valued at the lower of cost or net realisable value (1) which is an application of the concept of prudence (1). By over valuing the stock both the profit and the assets will be over-valued (1). Hence Rekha should be advised that her suggestion is not appropriate (1).	(5)
