

# **Mark Scheme (Results)**

January 2019

Pearson Edexcel IAL Accounting  
In Accounting (WAC12)  
Paper 01 Corporate and Management  
Accounting

**Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at [www.edexcel.com](http://www.edexcel.com) or [www.btec.co.uk](http://www.btec.co.uk). Alternatively, you can get in touch with us using the details on our contact us page at [www.edexcel.com/contactus](http://www.edexcel.com/contactus).

**Pearson: helping people progress, everywhere**

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: [www.pearson.com/uk](http://www.pearson.com/uk)

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Question Number	Indicative Content	Mark
1 (g)	<p><b>AO1 (1), AO2 (1), AO3 (4), AO4 (6)</b></p> <p>Answers may include:</p> <p><u>Case for new contract</u>  The present contract is profitable, covering fixed costs and bringing in a weekly contribution on all four products.  Weekly contributions of the present contract are:  London Bus 120 x £4.50 = £540  Policeman 200 x £3.22 = £644  Telephone Box 150 x £3.31 = £496.50  Mail Box 270 x £2.14 = £577.80  Total contribution = £2 258.30 out of a total weekly contribution of £4 575.95.  This is about 50% of the contribution.  If 50% of the fixed costs were absorbed by this order, there would be a profit of about £1 294  If the model Tower of London is costed and priced correctly, this should bring in a further contribution.  The contract could prove to be the basis for a bank loan which results in expansion of the business.</p> <p><u>Case against the new contract</u>  Handsome Ltd cannot meet the full weekly demand at present. Signing a contract with an additional model could mean even more potential customers are disappointed.  There is the possibility that Handsome Ltd may become too dependent on one customer. This may lead to possible difficulties in the future if this customer has trading problems.</p> <p><u>Other considerations</u>  Handsome Ltd will need to reconsider the company policy not to employ overtime. Workers may have to work overtime to meet weekly demand. Even if overtime premiums are paid, the contract should still be profitable. Alternatively, they could employ more hand painters, but there may be an issue with space available. Perhaps the company may have to move to new premises, but this could be expensive.</p> <p><u>Decision</u>  Handsome Ltd should probably take on the contract including the extra model, and introduce overtime to meet all the demand.</p>	(12)

Level	Mark	Descriptor
	0	A completely incorrect response.
Level 1	1-3	Isolated elements of knowledge and understanding recall based. Weak or no relevant application to the scenario set. Generic assertions may be present.
Level 2	4 - 6	Elements of knowledge and understanding, which are applied to the scenario. Chains of reasoning are present, but may be incomplete or invalid. A generic or superficial assessment is present.
Level 3	7 - 9	Accurate and thorough understanding, supported throughout by relevant application to the scenario. Some analytical perspectives are present, with developed chains of reasoning, showing causes and/or effects. An attempt at an assessment is presented, using financial and non-financial information, in an appropriate format and communicates reasoned explanations.
Level 4	10 - 12	Accurate and thorough knowledge and understanding, supported throughout by relevant and effective application to the scenario. A coherent and logical chain of reasoning, showing causes and effects. Assessment is balanced, wide ranging and well contextualised using financial and non-financial information and makes informed recommendations and decisions.

(6)

Question Number	Answer	Mark
2 (d)	<b>AO2 (10)</b> <b>AO2: Seven marks for correct calculation of year end balances. Three marks for correct calculation of gearing ratio.</b>	<b>(10)</b>

	Start Year	Adjustment in year	End Year	
Ordinary Shares of £1	56 000	+ 12 000	68 00	<b>(1)</b> <b>AO2</b>
Share Premium	14 000	+ 3 600	17 600	<b>(1)</b> <b>AO2</b>
Retained earnings	8 640	+ 4 730 <b>(1)AO2</b> + 23 530 – 11 500 <b>(1)AO2</b>	25 400	<b>(1)</b> <b>AO2</b>
General reserve	5 730	- 4730	1 000	<b>(1)</b> <b>AO2</b>
Foreign exchange reserve	8 000		8 000	
Revaluation reserve			80 000	<b>(1)</b> <b>AO2</b>
Long term bank loan			50 000	
Total			250 000	

$$\text{Gearing} = \frac{50\,000}{(200\,000 + 50\,000)} \times 100 = 20\% \quad \text{AO2 (1of)AO2}$$

Question Number	Indicative Content	Mark
2 (e)	<p><b>AO1 (1), AO2 (1), AO3 (4), AO4 (6)</b></p> <p>Answers may include:</p> <p><u>Case for Ordinary shares</u>  Shareholders do not have to be paid dividends, which is useful when short of funds.  No “outside” parties have any influence on the running of the company eg a place on the board, which banks may request.  No interest has to be paid, so the profits of the company will be higher. This will also help cash flow and liquidity.  No assets are offered as security, so there will be no claims on assets by banks if a loan not repaid, or the company fails.  Bank loans result in higher gearing, which increases risk to company. Issue of shares will reduce gearing.</p> <p><u>Case for Bank Loans</u>  Interest is allowable for tax, so the company may be able to retain more funds in the business. Possibly the tax saving may be greater than any dividends paid.  Banks may bring expertise and experience to the company, and maybe to the Board.  Banks may be flexible regarding repayments, length of loan etc which may be rescheduled.  A bank loan may be quicker and cheaper to arrange.  It may be difficult to persuade potential shareholders to take up more shares, given that a share issue has already occurred in the year.  A further issue of shares may dilute ownership of existing shareholders.</p> <p><u>Decision</u>  Should relate to above points made. For example, ordinary shares are a better source of finance.</p>	(12)

Question Number	Answer	Mark
3 (b)	<b>AO3 (6)</b> <b>AO3: Six marks for calculating the internal rate of return.</b>	<b>(6)</b>

Internal rate of Return

= Lower rate + (% difference between rates) x  $\frac{\text{NPV using lower \% rate}}{\text{(Difference between NPVs)}}$

= 8% **(1) AO3** +  $\frac{([12 - 8] \text{ **(1) AO3** } \times \frac{176\,103}{(176\,103 \text{ **(1of) AO3** } - 135\,670) \text{ **(1) AO3** } })}{(176\,103 \text{ **(1of) AO3** } - 135\,670) \text{ **(1) AO3** } }$

= 8% + (4 x 4.355)

= 25.42% **(1of) AO3**

Number	Indicative Content		Mark
3 (c)	<p><b>AO4 (6)</b> Question Answers may include:</p> <p><u>Case For Investment</u> The internal rate of return is 25.42% (o/f), which is greater than the 8% that is the benchmark figure for investment by the company. The net present value of the project is positive, at £176 103 (o/f) The project would look good in the Corporate Social Responsibility report – they have kept the theatre in the town alive and refurbished the theatre.</p> <p><u>Case Against Investment</u> The local government were unable to make a profit from the theatre, why should Two Masks plc be any different?</p> <p><u>Other points</u> The figures are only estimates - they could be better or worse for the company. Are there any other projects that may be invested in? Do these give a better (or worse) return? Does this investment fit the objectives and strategy of the company?</p> <p><u>Decision</u> The project should go ahead.</p>		(6)
Level	Mark	Descriptor	
	0	A completely incorrect response.	
Level 1	1-2	Isolated elements of knowledge and understanding which are recall based. Generic assertions may be present. Weak or no relevant application to the scenario set.	
Level 2	3-4	Elements of knowledge and understanding, which are applied to the scenario. Some analysis is present, with developed chains of reasoning, showing causes and/or effects applied to the scenario, although these may be incomplete or invalid. An attempt at an evaluation is presented, using financial and perhaps non-financial information, with a decision.	
Level 3	5-6	Accurate and thorough knowledge and understanding. Application to the scenario is relevant and effective. A coherent and logical chain of reasoning, showing causes and effects is present. Evaluation is balanced and wide ranging, using financial and perhaps non-financial information and an appropriate decision is made.

Gross profit	1 317 632	<b>(1of) AO3</b>

Question Number	Indicative Content	Mark
4 (c)	<p><b>AO4 (6)</b></p> <p><u>Case For Directors' Report</u>            Report gives information to e.g. shareholders which they could use to make a decision e.g. invest more funds in the company.            Shareholders / readers may be assured the company is acting in an ethical manner            Other stakeholders e.g. pressure group may use information in the Report to bring about change in company policy e.g. treatment of disabled            Disclosures may be required under Stock Exchange regulations, which may be appropriate in the Directors' Report e.g. legislation pending            Information is given to shareholders which allows them to see in some detail how the company is performing</p> <ul style="list-style-type: none"> <li>▪ E.g. principal activities, review of position of business</li> <li>▪ Post balance sheet events, future developments</li> <li>▪ Names of directors, interests of directors</li> <li>▪ Employee involvement, disabled employees policy</li> <li>▪ Political and charitable donations</li> <li>▪ Creditor payment policy, creditor payment days</li> </ul> <p><u>Case Against Directors' Report</u>            Report costs personnel time to prepare and money to print etc            Directors may use Report to "window dress" accounts, give an unrealistic positive view of the company, as it is in their interest to do so.</p> <p><u>Decision</u>            Should relate to above points. E.g. Directors' Report is useful.</p>	(6)
Level	Mark	Descriptor
	0	A completely incorrect response.
Level 1	1-2	Isolated elements of knowledge and understanding which are recall based. Generic assertions may be present. Weak or no relevant application to the scenario set.
Level 2	3-4	Elements of knowledge and understanding, which are applied to the scenario. Some analysis is present, with developed chains of reasoning, showing causes and/or effects applied to the scenario, although these may be incomplete or invalid.

		An attempt at an evaluation is presented, using financial and perhaps non-financial information, with a decision.
Level 3	5-6	Accurate and thorough knowledge and understanding. Application to the scenario is relevant and effective. A coherent and logical chain of reasoning, showing causes and effects is present. Evaluation is balanced and wide ranging, using financial and perhaps non-financial information and an appropriate decision is made.

Question Number	Indicative Content		Mark
5 (e)	<p><b>AO4 (6). Own figure rule applies throughout.</b></p> <p>Answers may include:</p> <p><u>Case For Continuing Trading</u>  The company has achieved break-even point and made a profit in November.  The planned production for January should yield a profit if all the units are sold. It may be that the company produces to order, which guarantees sales.  Production may have been low in December because the company was shut for a holiday period for a week.</p> <p><u>Case Against Continuing Trading</u>  The company made a loss in December. If this a regular occurrence, then the company may have no future.</p> <p><u>Other points</u>  The figures for January are only estimates - they could be better or worse for the company.  What is the future order book like for the company.  Does the company have past profits to keep the company solvent in periods of poor sales?</p> <p><u>Decision</u>  The company should/should not continue trading.</p>		(6)
