08:00 - 11:00

ΠΡΟΤΕΙΝΟΜΕΝΕΣ ΛΥΣΕΙΣ ΔΕΚΑΠΕΝΤΕ (15) ΣΕΛΙΔΕΣ

#### **ANSWER TO QUESTION 1**

#### Part (A)

#### **Workings**

| Per bottle of wine              | €    | €     | Fixed costs (per year) | €     |
|---------------------------------|------|-------|------------------------|-------|
| Selling price                   |      | 4,15  | Rent of land           | 865   |
| Grape juice & ingredients       | 1,07 |       | Depn (5.500 - 300) : 8 | 650   |
| Direct labour                   | 0,55 |       | Insurance              | 720   |
| Glass & cork                    | 0,78 | (2,4) | Water bill (120 x12)   | 1.440 |
| Contribution per bottle of wine |      | 1,75  |                        | 3.675 |

(i) Contribution per bottle of wine = Selling price – variable costs

Contribution per bottle of wine = €4,15 - €2,4 = €1,75

$$Break\ even = \frac{Total\ fixed\ costs*}{Contribution\ per\ unit} = \frac{\text{€3.675}}{\text{€1,75}} = 2\ \textbf{100}\ \textbf{bottles}\ \textbf{of}\ \textbf{wine} \tag{Marks 6}$$

(ii) Profit for the year = 
$$(5500 \times 1,75) - 3.675 = €5.950$$
 (Marks 1)

(iii) No of bottles for target profit: 
$$\frac{Fixed\ costs + Required\ profit}{Contribution\ per\ unit} = \frac{€3.675 + €10.325}{€1,75}$$

= <u>8 000 bottles</u> (Mark 1)

(iv) Margin of safety = 
$$5500 - 2100 = 3400$$
 bottles (Mark 1)   
( $K\varepsilon\varphi$ .  $8.2-8.4$   $\sigma\varepsilon\lambda$ .  $161-166$ )

#### (b) Characteristics of a limited company (Any Two)

- Περιορισμένη ευθύνη (Limited Liability)
- Διαχωρισμός μεταξύ ιδιοκτησίας και διεύθυνσης (ownership separate from management)
- Διακριτή νομική οντότητα (separate legal entity)
   (Mark 1)

(Κεφ. 4.1 σελ. 66)

25

#### Part (B) (a) (i)

# **AVCO (Perpetual Inventory System)**

| Date        | Details           | Units | Price per<br>unit | Balance |
|-------------|-------------------|-------|-------------------|---------|
| January 1   | Opening inventory | 100   | 9                 | 900     |
| January 8   | Purchases         | 120   | 10                | 1.200   |
| February 12 | Purchases         | 100   | 11                | 1.100   |
|             |                   | 320   | 10*               | 3.200   |
| March 9     | Cost of Sales     | (180) | 10                | (1.800) |
|             |                   | 140   | 10                | 1400    |
| June 15     | Purchases         | 100   | 13                | 1300    |
|             |                   | 240   | 11,25**           | 2.700   |
| July 14     | Cost of Sales     | (140) | 11,25             | (1.575) |
|             |                   | 100   | 11,25             | 1.125   |
| August 28   | Purchases         | 180   | 14                | 2520    |
|             |                   | 280   | 13,02***          | 3.645   |
| December 25 | Cost of Sales     | (100) | 13,02             | (1.302) |
|             |                   | 180   | 13,02             | 2.343,6 |

\*3.200:320 \*\*2.700:240 \*\*\*3.645:280 (Marks 7)

# (ii) LIFO method (Periodic Inventory System)

LIFO (Periodic): €1.700 (Marks 2)

Working:

| working.                    |            |
|-----------------------------|------------|
| Units of closing inventory: | Units      |
| Opening inventory           | 100        |
| Purchases (120+100+100+180) | <u>500</u> |
|                             | 600        |
| Sales (180+140+100)         | (420)      |
| Closing inventory           | 180        |
| Therefore 100X€9= €900      |            |
| 80X€10 <u>= €800</u>        |            |
| <u>€1.700</u>               |            |

(Κεφ. 2.4 - 2.5 σελ. 23-24, 28)

25

(b) Οι δύο διαφορετικοί μέθοδοι αποτίμησης του τελικού αποθέματος (LIFO, AVCO) επιδρούν στα μικτά κέρδη (Gross profit), τα οποία θα επηρεάσουν στον ίδιο βαθμό τα Καθαρά κέρδη (Net profit). Το τελικό απόθεμα με τη μέθοδο LIFO είναι €1.700 και είναι χαμηλότερο από το τελικό απόθεμα με τη μέθοδο AVCO €2.343,6. Αυτό έχει σαν αποτέλεσμα η μέθοδος LIFO να δείχνει χαμηλότερα κέρδη κατά €643,6

Αυτό έχει σαν αποτέλεσμα η μέθοδος LIFO **να δείχνει χαμηλότερα κέρδη κατά €643,6** (2.343,6 -1.700) από την μέθοδο ΑVCO επειδή το κόστος πωλήσεων είναι μεγαλύτερο.

(The two different inventory valuation methods affect both the Gross and the Net profit. Under the LIFO method above, the closing inventory is valued at  $\leq$ 1.700 and under AVCO it is valued at  $\leq$ 2.343.6. Therefore under the LIFO method both the Gross and the Net Profit will be lower by  $\leq$ 643.6 (2.343.6 -1.700) because it results at a higher cost of sales) (Mark 1) ( $\kappa \approx$ 0.2.6  $\sigma \approx \lambda$ .29)

#### **ANSWER TO QUESTION 2**

# (a) (i) Columbus Products Ltd Statement of Profit or Loss for the year ended 31 December 2018

| Ctatement of Front of 2000 for the year ended t | _       | _           |
|---|---------|-------------|
|   | €       | €           |
| Revenue (W1)                                    |         | 2.690.000   |
| Cost of sales (W2)                              |         | (1.581.000) |
| Gross profit                                    |         | 1.109.000   |
| Administrative expenses (W3)                    | 330.000 |             |
| Distribution costs (W4)                         | 212.000 | (542.000)   |
| Profit from operations                          |         | 567.000     |

|------|-----------------|-----------------------|--|
| 0    | (10.000)        | (10.000)              |  |
| 1    | 4.500           | (5.500)               |  |
| 2    | 2.500           | (3.000)               |  |
| 3    | 2.500 (500)     |                       |  |
| 4    | 2.500           | 2.500                 |  |

The Payback period of machine F is **3 years and 2,4\* months** 500/2.500X12=2,4 months

#### **Machine G**

| year | Cash flows<br>€ | Cumulative cash flows) |
|------|-----------------|------------------------|
| 0    | (10.000)        | (10.000)               |
| 1    | 3.500           | (6.500)                |
| 2    | 3.500           | (3.000)                |
| 3    | 4.000           | 1.000                  |
| 4    | 2.500           | 3.500                  |

The Payback period of machine G is **2 years and 9 \*months** \*3.000/4.000x12=9 months

(Marks 4)

#### (ii) Average Rate of Return (ARR)

| Year | Machine F  |                | Machine G       |            |                |                   |
|------|------------|----------------|-----------------|------------|----------------|-------------------|
|      | Cash flows | Depn*          | Net Profit      | Cash flows | Depn**         | Net Profit        |
|      | €          | €              | €               | €          | €              | €                 |
| 1    | 4.500      | 1.700          | 2.800           | 3.500      | 1.600          | 1.900             |
| 2    | 2.500      | 1.700          | 800             | 3.500      | 1.600          | 1.900             |
| 3    | 2.500      | 1.700          | 800             | 4.000      | 1.600          | 2.400             |
| 4    | 2.500      | 1.700          | 800             | 2.500      | 1.600          | 900               |
| 5    | 1.000      | 1.700          | (700)           | 1.500      | 1.600          | (100)             |
|      |            |                | 4.500           |            |                | 7.000             |
|      |            | Average profit | 4.500/5=<br>900 |            | Average profit | 7.000/5=<br>1.400 |

<sup>\*10.000-1.500=8.500/5=1.700</sup> per year

Machine F ARR=Average net profit /initial capital

ARR= 900x100/10.000=9%

**Machine G** ARR=Average net profit /initial capital

ARR= 1.400x100/10.000=**14%** 

(Marks 10)

- **(b)** The managers of Fresco Ice cream Company **should purchase machine G** because it has the:
  - √ Shortest Payback period
  - ✓ Higher ARR than machine F

(Kεφ.9.3, 9.4 σελ.177-180)

(Marks 3)

(c) Calculation of Gearing:

Gearing ratio= 
$$\frac{\text{€900.000+€600.000}}{\text{€900.000+€600.000+€500.000}} = \frac{75\%}{\text{(Marks 2)}}$$

Η εταιρεία έχει **75%,** δείκτη δανειακής επιβάρυνσης που **θεωρείται ψηλό** αφού είναι ένδειξη ότι αυτή χρηματοδοτείται κυρίως από ξένα κεφάλαια, **εξαρτάται από δάνεια** και **περικλείει κινδύνους** σε περίπτωση μη αποπληρωμής τους.

(The company is highly geared. It is mainly financed by external sources and is therefore at high risk)

(Κεφ.7.7, σελ.145-146)

(Mark 1)

(Total Marks 20)

<sup>\*\*10.000-2.000=8.000/5=1.600</sup> per year

# ANSWER TO QUESTION 5 PART (A) (a)

Plexi Ltd Manufacturing A/c for the year ended 31 December 2018

|                                      | €       | €       |
|--------------------------------------|---------|---------|
| Raw Materials:                       |         |         |
| Opening inventory                    |         | 31.000  |
| Add Purchases                        | 179.100 |         |
| Add Carriage Inwards                 | 1.200   | 180.300 |
|                                      |         | 211.300 |
| Less Closing inventory               |         | 31.400  |
| Cost of Raw Materials used           |         | 179.900 |
| Direct labour                        |         |         |
| Manufacturing wages (79.500+500)x6/8 |         | 60.000  |
| Direct expenses                      |         |         |
| Patents and Royalties                |         | 6.500   |
| PRIME COST                           |         | 246.400 |
| Factory Overheads                    |         |         |
| Light and heat (4.900-800)x60%       | 2.460   |         |
| Factory supervisor's salary          | 14.000  |         |
| Manufacturing wages (79.500+500)x2/8 | 20.000  |         |
| Rent (8.000+900)x60%                 | 5.340   |         |
| Depreciation of factory machinery    | 11.400  | 53.200  |
| Work in Progress                     |         |         |
| Add work in progress at start        | 8.500   |         |
| Less work in progress at end         | (7.550) | 950     |
| Cost of Production                   |         | 300.550 |

(Κεφ.3.1- 3.4 σελ 37-43)

(Marks 7)

(b)

| Plexi Ltd  |         |           |  |  |
|--|---------|-----------|--|--|
| Income Statement for the year ended 31 December 2018 |         |           |  |  |
|  | €       | €         |  |  |
| Sales  |         | 461.000   |  |  |
| Less Cost of sales:                                  |         |           |  |  |
| Opening inventory of finished goods                  | 8.140   |           |  |  |
| Purchases of finished goods                          | 30.850  |           |  |  |
| Add carriage inwards                                 | 200     |           |  |  |
| Cost of goods manufactured                           | 300.550 |           |  |  |
|  | 339.740 |           |  |  |
| Less Closing inventory of finished goods             | (8.250) | (331.490) |  |  |
| Gross profit   |         | 129.510   |  |  |

(Kεφ. 3.5 σελ 44) (Marks 3)

# PART (B)

(a)

| Formula   | 2019  | 2018  |
|---|---|---|
| i) Gross Profit Margin = $\frac{\text{Gross Profit}}{\text{Sales}} \times 100$                    | $\frac{\stackrel{€}{=}280.000}{\stackrel{€}{=}800.000} \times 100 = 35\%$ | $\frac{\text{€450.000}}{\text{€850.000}} \text{x100} = 52,94\%$ |
| ii) ROCE = $\frac{\text{Net Profit before interest}}{\text{Total capital employed**}} \times 100$ | €58.000 + €22.000<br>€200.000 x100 = <b>40</b> %                          | €91.000+€24.000<br>€179.000 x100=<br><b>64,25</b> %             |
| iii) Receivables collection days =  Trade receivables Credit Sales x365                           | €135.000<br>€720.000* x 365 = <b>68,4 days</b>                            | €75.000<br>€765.000 × 365 = <b>35,78</b> days                   |

(Marks 6)

\*2018 credit sales: 850.000x90%= 765.000 credit sales: 800.000x90%= 720.000

\*\***2018** Total CE: 40.000+19.000+120.000= 179.000 **2019** Total CE: 40.000+10.000+150.000= 200.000

This resource was created and owned by Cy MOEC

- (b) (i) Το ποσοστό Μεικτού κέρδους έχει μειωθεί κατά 17,94% δηλαδή από 52, 94% το 2018 σε 35% το 2019. Αυτή η μείωση μπορεί να οφείλεται σε διάφορους παράγοντες όπως:
  - Στην *αύξηση της τιμής αγοράς* που δεν επιβαρύνει τους πελάτες
  - Στην αγορά προϊόντων από άλλο προμηθευτή σε ψηλότερη τιμή
  - Στη μείωση της τιμής πώλησης

(The gross profit margin was reduced by 17,94% from 52,94% in 2018 to 35% in 2019) Some of the reasons for this reduction could be:

- An increase in the purchase price not been passed on to customers
- The purchase of goods from a different supplier at a higher price
- A decrease in the selling price

(Marks 2)

- (ii) Όσο πιο μικρή είναι η περίοδος είσπραξης των χρεωστών, τόσο καλύτερο είναι για την επιχείρηση επειδή:
  - Η επιχείρηση θα εισπράξει τις απαιτήσεις της σε σύντομο χρονικό διάστημα και αυτό θα έχει θετική επίδραση πάνω στις ταμειακές της ροές
  - Μειώνει την πιθανότητα για επισφαλείς απαιτήσεις

(The shorter the Trade Receivables collection period the better for the company because:

- It will have a positive effect on its cash flow
- It will reduce the risk of irrecoverable debts)

(Marks 2)
