Examiner's use only

Materials required for examination

Mathematical Formulae (Pink)

Items included with question papers

Nil

Calculators may NOT be used in this examination.

Instructions to Candidates

In the boxes above, write your centre number, candidate number, your surname, initials and signature. Check that you have the correct question paper.

Answer ALL the questions.

You must write your answer for each question in the space following the question.

Information for Candidates

A booklet 'Mathematical Formulae and Statistical Tables' is provided.

Full marks may be obtained for answers to ALL questions.

The marks for individual questions and the parts of questions are shown in round brackets: e.g. (2).

There are 10 questions in this question paper. The total mark for this paper is 75.

There are 32 pages in this question paper. Any blank pages are indicated.

Advice to Candidates

You must ensure that your answers to parts of questions are clearly labelled. You should show sufficient working to make your methods clear to the Examiner. Answers without working may not gain full credit.

This publication may be reproduced only in accordance with Pearson Education Ltd copyright policy.

Leave blank

10. A curve with equation y = f(x) passes through the point (4, 9).

Given that

$$f'(x) = \frac{3\sqrt{x}}{2} - \frac{9}{4\sqrt{x}} + 2, \quad x > 0$$

(a) find f(x), giving each term in its simplest form.

(5)

Point *P* lies on the curve.

The normal to the curve at P is parallel to the line 2y + x = 0

(b) Find the *x* coordinate of *P*.

(5)

Question Number	Scheme			Marks
10(a)	$f(x) = x^{\frac{3}{2}} - \frac{9}{2}x^{\frac{1}{2}} + 2x(+c)$		M1: $x^n \rightarrow x^{n+1}$ A1: Two terms in x correct, simplification is not required in coefficients or powers A1: All terms in x correct. Simplification not required in coefficients or powers and $+$ c is not required M1: Sub $x = 4$, $y = 9$ into f (x) to	- M1A1A1
	Sub $x = 4$, $y = 9$ into $f(x) \Rightarrow c$	=	obtain a value for c. If no + c then M0. Use of $x = 9$, $y = 4$ is M0.	M1
	$(f(x) =) x^{\frac{3}{2}} - \frac{9}{2} x^{\frac{1}{2}} + 2x + 2$	simpl Must	ified e.g. $f(x) = x^{\frac{3}{2}} - 4.5\sqrt{x} + 2x + 2$ be all 'on one line' and simplified .	A1
(b)				(5)
(b)	Gradient of normal is $-\frac{1}{2} \Rightarrow$ Gradient of tangent = +2	M1: Gradient of $2y + x = 0 \text{ is } \pm \frac{1}{2}(m) \Rightarrow \frac{dy}{dx} = -\frac{1}{\pm \frac{1}{2}}$ A1: Gradient of tangent = +2 (May be implied)		M1A1
	The A1 may be implied by $\frac{-1}{\frac{3\sqrt{x}}{2} - \frac{9}{4\sqrt{x}} + 2} = -\frac{1}{2}$			
	$\boxed{\frac{3\sqrt{x}}{2} - \frac{9}{4\sqrt{x}} + 2 = 2 \Rightarrow \frac{3\sqrt{x}}{2} - \frac{9}{4\sqrt{x}}}$	$\sqrt{x} = 0$	Sets the given $f'(x)$ or their $f'(x)$ = their changed m and not their m where m has come from $2y + x = 0$	M1
	$\times 4\sqrt{x} \Rightarrow 6x - 9 = 0 \Rightarrow x = \dots$	only value solvi corre	x or equivalent correct algebraic essing (allow sign/arithmetic errors) and attempt to solve to obtain a e for x . If $f'(x) \neq 2$ they need to be ang a three term quadratic in \sqrt{x} ectly and square to obtain a value for ust be using the given $f'(x)$ for this k .	M1
	$x = 1.5$ $x = \frac{3}{2}(1.5)$ If any 'e		A1 (5)	
	2 4\v/\lambda		$\frac{\sqrt{x}}{2} - \frac{1}{2} = -\frac{1}{2}$ etc. leads to the correct	(5)
	answer and could score M1A1M1M0(incorrect processing)A0			(10 marks)
		(10 marks)		

$\frac{Appendix}{6(a)}$
