14 (d)	<p>Award (1) mark for a general statement regarding the change in liquidity over the two years; a further (2) marks for a discussion on the meaning of each individual ratio; (1) mark for the implication for their creditors and a final (1) mark for a conclusion.</p> <p>Sample answer</p> <p>The liquidity of the business has worsened over the two years (1) which is evidenced by the reduction in both ratios. The current ratio indicates that they are just able to cover their short term debts (1) whereas their quick ratio indicates that they are below the ideal ratio of 1:1. (1) The implication of this for a creditor is that the business may experience some difficulty in meeting its short term debts (1).</p> <p>The business needs to consider whether it needs to take steps to invest more cash into the business in order to meet its short term obligations (1)</p>	<p>(5)</p>

13(b)(i)	Sample answer With additional information 5 I have used the accruals (matching) concept (1), which states that only transactions relating to the year under consideration should be included in the final accounts (1).	(2)

Question Number	Answer	Mark
13(b)(ii)	Sample answer With additional information 6 I have used the business entity concept (1), which states that only transactions involving the business should be included in the business books (1). The goods for own use are drawings and as such, they need to be ignored in the calculation of cost of sales . Only the purchases used in the business are recorded (1).	(3)
